

Namaste! I am a senior-year undergraduate student, currently studying at the Indian Institute of Technology Kanpur, pursuing a Bachelor of Technology in Electrical Engineering. I am broadly interested in research in the fields of Computer Vision, Image Processing and Human-Computer Interaction.

My research experience started with SURGE intern in the summer of 2017, with Professor K S Venkatesh, IIT Kanpur. I also did another project on Image Steganography with him in the following Fall semester.

I came to UF in the summer of 2018 as an intern in the Jain lab, under the guidance of Professor Eakta Jain and Ms. Pallavi Raiturkar, to work on eye-tracking, pupillary measurements, understanding engagements on videos.

Apart from my academic pursuits, I enjoy teaching, dancing, playing basketball, travelling and more or less any new activity!
